
***RENAL REPLACEMENT THERAPY
ORGAN DONATION AND TRANSPLANTATION
IN THE KINGDOM OF SAUDI ARABIA***

Preface

The annual report 2008 highlights the present status of renal replacement therapy in the Kingdom of Saudi Arabia. The report is classified into dialysis - hemo and peritoneal-, organ donation and organ transplantation sections. All necessary steps have been undertaken by the Medical Department at the Saudi Center for Organ Transplantation (SCOT), to ensure accuracy. SCOT is the central body coordinating renal replacement therapy throughout the Kingdom.

The data are provided in table and graphic forms and each section has a brief introduction highlighting the salient aspects of the data contained in the relevant section.
